# Seasonal Venues (v2.1)

Lists all venues used in a league's specific season.

**\*Addon Required\*:** None (CORE)

## URL Examples:

### CSV:

`https://api.mysportsfeeds.com/v2.1/pull/nhl/2025-2026-regular/venues.csv`  
(`https://api.mysportsfeeds.com/v2.1/pull/nhl/2025-2026-regular/venues.csv`)

### JSON:

`https://api.mysportsfeeds.com/v2.1/pull/nhl/2025-2026-regular/venues.json`  
(`https://api.mysportsfeeds.com/v2.1/pull/nhl/2025-2026-regular/venues.json`)

### XML:

`https://api.mysportsfeeds.com/v2.1/pull/nhl/2025-2026-regular/venues.xml`  
(`https://api.mysportsfeeds.com/v2.1/pull/nhl/2025-2026-regular/venues.xml`)

### XSD (for XML):

`https://api.mysportsfeeds.com/v2.1/xsd/nhl/seasonal_venues`  
(`https://api.mysportsfeeds.com/v2.1/xsd/nhl/seasonal_venues`)

PULL URL Syntax	Response	Code Samples
-----------------	----------	--------------

Issue a HTTPS GET request to:

`https://api.mysportsfeeds.com/v2.1/pull/nhl/{season}/venues.{format}`

with optional parameters:

`team={list-of-teams}` (*filter teams*)  
`force={force-if-not-modified}` (*force content*)

where:

Parameter	Description
{season}	<p>a value obtained by concatenating</p> <p>(season start year) + "-" + (season end year) + "-" + either "<b>regular</b>" or "<b>playoff</b>", depending on the season's type</p> <p><i>Note:</i> if the starting and ending years are the same, you can just specify the single year.</p> <p>You can also use the special keywords <b>current</b>, <b>latest</b> or <b>upcoming</b>.</p> <p>Using <b>current</b> relates to the current in-progress season (whether regular or playoff). If a current season is not in progress (offseason), you'll receive an empty response with response code <b>400</b>. Using <b>latest</b> will return the latest season (whether regular or playoff).</p> <p>Note that <b>current</b> and <b>latest</b> will in fact apply to the same season if a season is in progress.</p> <p>Using <b>upcoming</b> will only apply to a season which has been added, but has not yet actually started. This applies in cases where the upcoming season's game schedule is available, but there is no current season underway (offseason, or between regular and playoff seasons). If no applicable season is available, an empty 400 response is returned.</p> <p>Valid examples are:</p> <ul style="list-style-type: none"><li>• <b>2016-2017-regular</b></li><li>• <b>2016-playoff</b></li><li>• <b>current</b></li><li>• <b>latest</b></li><li>• <b>upcoming</b></li></ul>
{format}	one of <b>csv</b> , <b>xml</b> , or <b>json</b>

Parameter	Description
<code>team={list-of-teams}</code>	<p>(<i>optional</i>) comma-delimited list of one or more teams.</p> <p>If this parameter is omitted, by default ALL teams are included.</p> <p>In addition, for either the <b>player_gamelogs</b> or <b>team_gamelogs</b>, at least one player, team, or game MUST be specified.</p> <p>There are several acceptable formats for a team. Each is case-insensitive, and strips out any punctuation.</p> <p>Team ID:</p> <p><b>24</b></p> <p>Team abbreviation:</p> <p><b>bos</b></p> <p>City and team name:</p> <p><b>boston-celtics</b></p>

<code>force={force-if-not-modified}</code>	<p>(<i>optional</i>) Valid values are <b>true</b> or <b>false</b>.</p> <p>Specifies whether to "force" content to be returned and avoid an empty 304 response. (See Response Codes section for more details)</p> <p>Defaults to "true", which will always return the most up-to-date content based on your subscription level.</p> <p>Specifying "false" will also avoid any throttling restrictions on your requests. See the Throttling section for more.</p>
